

## Board Report May 2020 Submitted by Casey Miller

The school may be closed, but that does not mean there is not still work to be done. Even though most of us here at ExCEL have not laid eyes on our students in over a month, the staff is still dedicated to the program and the kids.

Student news- ExCEL still sits at 61 members of the wolfpack for May, but we have already been getting names for students who will start with us in the fall.

With all classes being done either online or via paper packets we have seen the majority of our students engaging in the lessons and motivating themselves to learn in these difficult times.

Staff news- Since the COVID-19 closure not only has the staff here at ExCEL planned work to be sent home each week, deliver that work and pick up completed packets but they have also been keeping up on IEP meetings and reevaluations. During this time our staff has conducted over 20 annual IEP meetings and 6 reevaluations either via phone call or virtual meetings to ensure our dates are met and that our students continue to be served to the best of our abilities.

Building news- With the official closure of the school for the remainder of the year, Mr. Kegebein is beginning to get the building ready for summer maintenance. This means getting rooms cleared out to paint and prepping the floors for their annual scrubbing and waxing. We hope to come back in the fall to a building looking like new after the long closure.
