

ExCEL Board Report

May 2019

Submitted by Casey Miller

With Summer right around the corner and all testing and meetings completed.... The end is near. The 2018/2019 school year has been full of memories and snow days, but like all good things, this too must come to an end.

Student news- There are currently 62 wolves in the ExCEL pack. All students who tested this year put forth maximum effort in their testing and I am sure their scores will reflect their effort. This is the time of year where we can truly show pride in our program. We will have 5 seniors graduating on May 24 this year to go along with 9 students in the 8th grade being promoted to high school. Along with the graduation success we will have 2 high school students transitioning back to their home schools as well as 1 student from both the elementary and middle school at the close of this year.

Staff news- Our staff member of the month is Mrs. Tina Matney. Mrs. Matney is one of our top para professionals and in-house substitute. She has to wear many hats throughout the day and she wears them all well. It is for her dedication to the program and willingness to take on any challenge that comes her way that she has been elected as the staff member of the month.

Building news- The building is getting ready for the summer crew to start mapping out all repairs and improvements heading our way over the summer. The gym and hallways will get a nice update over the summer months with a new coat and color of paint to brighten up the school.
