

ExCEL Board Report

August 2019

Submitted by Casey Miller

As the shortest summer on record comes to a close ExCEL is looking better than ever and is ready for a great year. The summer crew has really stepped it up this year and the building is almost unrecognizable.

Student news- With the students due back in just a couple of weeks, we are awaiting all of those registration packets to return so we can get a jump on setting up our rosters and getting skyward squared away.

Staff news- ExCEL will be welcoming many new faces this school year. We will have a new PE teacher, elementary teacher, middle school teacher, and high school teacher to starting with us this school year.

Building news- This summer has been a busy one for the physical building of ExCEL. The gym floor received its first refinishing since the early 1960's. We have also upgraded our technology in the classrooms and have installed Clevertouch boards in nearly every room. We have also upgraded our network to be able to accommodate the use of Chromebooks in the classrooms across the building. The summer crew has been working hard since June to make the hallways and stairwells as appealing as a school can be. With new blue and white paint around the building our students will have a whole new environment to come back to.
